

HIGH CAPACITY CLEANING MACHINE PSM FOR GREEN AND ROASTED COFFEE

High Capacity Cleaning Machine PSM

HIGH CAPACITY CLEANING MACHINE PSM FOR GREEN AND ROASTED COFFEE

»Rotary principle provides optimum sifting efficiency.

»Large throughput capacity for minimal floor space

»Quick change-over of sieve

»Low noise operation

»Enclosed dust free system

Construction:

The rigid steel frame construction houses the sieve magazine which is mounted on flexible rods. The 'V-belt' drive and oscillating weights located beneath the sieve magazine, provide a circular motion which is infinitely variable up to a stroke of 30mm. The sieve magazine is constructed from steel with dust tight inlet and outlet bellows.

The sieves are easily exchanged using the pull-out draw construction. Rubber balls located between the sieves and tray, constantly clean the sieves during operation. The outlet vertical air separator uses an adjustable airstream to remove dust and other light particles.

Accessories:

Dust cyclone separator with airlock, fan, piping and dust filter if applicable

Technical Data:

Capacities

from 5t / h to 60t / h
